Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11-13 and 29 are rejected under 35 U.S.C. 102(b) as being anticipated by Robinson. Robinson shows the use of a first and second head restraint support (48) having a first elongate portion (54) for receiving a bun (16) thereon; a bracket (46); and a latch mechanism (32), the latch mechanism including a rotatable cam (72) that can be selectively rotated independently of the first head restraint support between a latched position in which a second portion (70) of the first head restraint support is engaged by an end surface of the rotational earn and thereby, locked against pivotal movement and an unlatched position in which the second portion of the first head restraint support can pivot immediately over the cam (see Figs. 3 and 4).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14-18, 20-21, and 30-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Robinson in view of Kamrath et al. Robinson shows the use of a first stop pin

(108) attached to the bracket and a stabilizer bar (28) via the headrest frame. Robinson further shows the use of a first and second latch surfaces (62,64) on the second portion of the first head restraint support which engages the stop pin to prohibit rotation. A tension spring (78) biases the cam in a first direction. A cable pin included on the cam receives an end (88) of a cable wire (86). Robinson shows all of the teachings of the claimed invention except the use of a rotational bar extending through the first and second head restraint supports and the use of cylindrically shaped head restraint supports. Kamrath et al. shows the conventional use of a rotational bar (36) extending through first and second head restraint supports (31) which have a cylindrically shaped geometry. It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the head restraint of Robinson with a rotational bar and cylindrically shaped head restraint support, as taught by Kamrath et al. in order to better secure and stabilize the bun during rotational movement of the first and second head restraint supports.

Allowable Subject Matter

Claims 22-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to claims 11-16 have been considered but are moot in view of the new ground(s) of rejection.
